Professional Summary

Computer Science undergraduate specializing in **Artificial Intelligence and Machine Learning (AI/ML)**, with **MERN-stack and Python** internships and **Java/DSA** skills. Built full-stack, REST API, and ML forecasting projects; co-inventor of an ARIMA–LSTM system with a published patent application. Seeking Software Engineer, Full-Stack Developer, Python Developer, or AI/ML Engineer internships and entry-level roles.

Technical Skills

Programming Languages: Python, Java, C, JavaScript, HTML, CSS
Web Development: React.js, Node.js, Express.js, FastAPI, Tailwind CSS, **REST API Development**
Machine Learning: Scikit-learn, Random Forest, XGBoost, ARIMA, LSTM, Isolation Forest, Deep Learning
ML Methods: Time-Series Forecasting, Data Preprocessing, Model Training, **Model Evaluation**
Databases & Tools: MongoDB, Git, GitHub, VS Code, ServiceNow, Chart.js, Android Development
CS Fundamentals: Data Structures and Algorithms (DSA) in Java, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems

Experience

MERN Stack Developer Intern **May 2026 – Jun 2026**
Main Crafts Technology *Nagpur, Maharashtra*
- Developed **MERN-stack web applications** using React.js, Node.js, Express.js, and MongoDB, integrating frontend, backend, and persistent storage for **4 CRUD operations**: create, read, update, and delete.
- Implemented **2 task-management workflows** for creating and viewing tasks, integrating the user interface with backend application data.

Python Developer Virtual Intern **Mar 2026**
Kodbud *Remote*
- Wrote **Python programs** for structured programming exercises and application-focused internship assignments.

ServiceNow Virtual Intern **Jun 2025 – Jul 2025**
ServiceNow *Remote*
- Trained in **ServiceNow enterprise workflows** and application development through guided platform modules.

Frontend Developer **Feb 2025 – May 2025**
Kelicalix Technologies *Maharashtra, India*
- Applied **responsive web design** principles while contributing to frontend layouts and user interface (UI) elements.

Projects

Hybrid AI Time-Series Forecasting System *ARIMA, LSTM, Python*
- Co-invented a **time-series forecasting** framework combining **2 modeling approaches**—statistical **ARIMA** and deep-learning **LSTM**—for multi-step prediction.
- Supported **data preprocessing, model training, and evaluation**; patent application **202521127184 A** was published in India on January 2, 2026.

ExfilSentinel: Company Data Exfiltration Detection *React, FastAPI, MongoDB, ML*
- Built a security operations center (SOC) application for **insider threat detection**, using behavioral metadata, live telemetry, and **3 ML models**: Isolation Forest, Random Forest, and XGBoost.
- Integrated a **React/Chart.js dashboard** with **FastAPI REST APIs** for threat scoring, attack simulation, and monitoring across **4 activity categories**: network, file system, process, and USB.

Stock Market Price Prediction *React, FastAPI, ARIMA, LSTM, GBRT*
- Created **FastAPI REST APIs** for Yahoo Finance price history and forecasting, connecting React charts to **3 models**: ARIMA, LSTM, and Gradient Boosted Regression Trees (GBRT).
- Implemented **backtesting metrics**: RMSE, MAE, MAPE, R-squared, and directional accuracy, with **holdout-based model selection**.

To-Do List App *HTML, CSS, JavaScript*
- Deployed a **responsive JavaScript task manager** supporting **4 task actions**: add, edit, delete, and mark complete, with **input validation** and browser local-storage persistence.

Education

Symbiosis Institute of Technology, Nagpur **Ongoing**
B.Tech, Computer Science Engineering (Honours: AI & ML) *Nagpur, Maharashtra*
